

Summary

Software Engineering student and Full-Stack Developer with strong foundations in C/C++, Unix systems, networking, backend development, databases, and Docker. Experienced with Spring Boot, Next.js, React, PostgreSQL, and REST APIs.

Collaborative, adaptable, and motivated to learn new technologies, explore different areas of software engineering, and contribute effectively within a team.

Experience

- PFE Project – E-Commerce Bookstore Platform**

Backend / Full-Stack Developer

Spring Boot, Next.js, PostgreSQL, Tailwind CSS, Docker, REST APIs

 - Developed a full-stack bookstore with product catalog, cart, checkout, order management, and admin dashboard.
 - Built REST APIs, PostgreSQL models, responsive Next.js interfaces, and Dockerized application services.

Morocco
March 2026 – Jun 2026

Projects

- Distributed Task Management API**

Backend REST API

Java, Spring Boot, PostgreSQL, Docker, REST API, JWT

 - Built a layered Spring Boot REST API with services, repositories, DTOs, and PostgreSQL persistence.
 - Implemented JWT authentication, role-based access, teams, projects, tasks, comments, priorities, and statuses.
- Mini Cloud File Storage System**

File Storage Backend

Java, Spring Boot, PostgreSQL, Docker, REST API

 - Developed secure file upload, download, deletion, folder organization, and metadata management.
 - Implemented authentication, file ownership, sharing permissions, validation, and PostgreSQL persistence.
- ft_irc**

IRC Chat Server

C++, Sockets, TCP/IP, IRC Protocol

 - Built a real-time C++ IRC server supporting multiple clients, channels, private messages, and IRC commands.
 - Implemented non-blocking I/O, socket communication, authentication, command parsing, and event management.

42 Common Core
- Inception**

Docker Infrastructure

Docker, Docker Compose, NGINX, WordPress, MariaDB, Linux

 - Built a containerized infrastructure with separate NGINX, WordPress, and MariaDB services using Docker Compose.
 - Configured custom Dockerfiles, TLS, volumes, networks, environment variables, and service dependencies.

42 Common Core

Education

- UM6P/1337 – 42 Network**

Computer Software Engineering; Common Core

Bengrir, Morocco
2024 – 2027
- FST Beni Mellal**

Bachelor’s Degree in Computer Science

Beni Mellal, Morocco
2022 – Jun 2026

Programming Skills

- Languages:** C, C++, Java, JavaScript, TypeScript, SQL, Shell
- Technologies:** Spring Boot, Next.js, React, Tailwind CSS, Node.js, REST APIs, Docker, Docker Compose, Git, GitHub, Linux, Makefile
- Databases:** PostgreSQL, MySQL, SQLite
- Concepts:** Unix processes, threads, sockets, TCP/IP, signals, parsing, OOP, API design, authentication, database design
- Spoken Languages:** French professional working proficiency, English professional working proficiency
